

```
abstract class Person
{
    public String name;
    public String address;

    public Person (String name, String address)
    {
set Name this.name = name;
        public void this.address = address;
    }

    public void setName (String name)
    {
        this.name = name;
    }

    public String getName()
    {
        return name;
    }

    public void setAddress (String address)
    {
        this.address = address;
    }

    public String getAddress()
    {
        return address;
    }

    public abstract void display();
}
```

```
this.salary = salary;
```

② Override

```
public void display() {  
    System.out.println("Name  
+ get.Name());  
    System.out.println("Address  
+ get.Address());  
    System.out.println("Salary: " +  
    salary);  
}
```

```
public class Customer extends
```

```
Person {
```

```
    private int balance;
```

```
    public Customer(String name,
```

```
    String address, int balance)
```

```
{  
    super(name, address);  
    this.balance = balance;  
}
```

② Override

```
public void display() {  
    System.out.println("Name: " + get.Name());  
    System.out.println("Address: " + get.Address());  
    System.out.println("Balance: " + balance);  
}
```
